Abhishek Ambekar

abhishek.ambekar420@gmail.com | LinkedIn

Engineering Management graduate with 2+ years in inventory operations, procurement, and warehouse process improvement. Hands on with Oracle NetSuite WMS and SAP MM, with a track record of raising inventory accuracy and pick productivity through slotting, 5S, and cycle count discipline. Experienced in tracking POs and supplier deliveries, building KPI dashboards in Excel and Power BI, and driving cost savings through should cost modeling and supplier negotiation. Comfortable working across warehouse, finance, and supplier teams in fast paced environments.

EDUCATION

Duke University — Durham, USA
Master of Engineering Management | GPA: 3.91 — Aug 2024 - May 2026

K. J. Somaiya College of Engineering — Mumbai, India
Bachelor of Technology, Mechanical Engineering | GPA: 3.65 — Aug 2018 - Jun 2022

PROFESSIONAL EXPERIENCE

Duke University Stores — Durham, USA
Operations Associate — Mar 2025 - May 2026

- Raised order completion productivity **33%** by arranging bins by pick frequency, **labeling storage locations**, and applying 5S and FIFO.
- Picked, packed, and shipped campus and online orders via UPS and FedEx, scaling to 1,000+ orders during holiday and game day peaks; generated shipping labels and shared tracking to keep customers updated.
- Maintained **95%+ inventory accuracy across 10,000+ SKUs** through cycle counts, inventory reconciliations, and periodic stock audits.
- Received 15+ inbound POs and processed 50+ transfer orders weekly in **Oracle NetSuite WMS**; resolved **receiving and transfer discrepancies against POs** to keep inventory records accurate and material fully traceable across storage locations.

I Will Foundation — Mumbai, India
Program Manager — Oct 2023 - Jun 2024

- **Planned supplies and logistics** for 6+ community health checkup drives with a 12 member team serving 1,200+ people; built a 20 to 25% buffer on high demand items and tracked actual turnout each drive to sharpen supply quantities for the next.
- Coordinated vendors and internal teams across 6+ concurrent programs using Excel based trackers for supplies, transport, and site readiness; surfaced scheduling risks early in recurring stakeholder meetings and drove corrective actions to closure.

JSW Steel Ltd — Mumbai, India
Supply Chain & Operations Engineer — Aug 2022 - Aug 2023

- Owned the **RFQ to PO cycle for ~$6M in annual CAPEX/OPEX spend** across MRO spares, maintenance services, and plant equipment in **SAP MM and Ariba**; delivered **15% savings** on negotiated packages through should cost modeling and supplier negotiation.
- Built Excel and **Power BI dashboards** tracking open PO status, supplier delivery performance, and cost center budgets weekly.
- Managed POs after award, tracking delivery commitments, payment terms, and compliance documents; expedited late suppliers and **escalated at risk parts early** with engineering to keep plant maintenance and shutdown schedules on track.
- Tracked **critical spare parts stock** for the coke oven department across MRO spares, wear parts, consumables, and automation hardware against consumption and operating schedules; flagged shortfalls early to **prevent stockouts and downtime.**

Space Renaissance — Mumbai, India
Robotics and Hardware Design Intern — Jun 2021 - Aug 2021

- Developed **engineering BOMs** for a 20+ component robotic prototype, defining part requirements, quantities, and specifications for each component to support design reviews and build readiness through the prototype build cycle.
- Compared six actuator materials on manufacturability, feasibility, and quality to select the best fit for the prototype.

CONSULTING EXPERIENCE

QATCH Technologies — Durham, USA
Student Consultant | Business Strategy (Biotech/Healthcare) — Aug 2025 - Dec 2025

- Conducted **customer segmentation** across **700+ biopharma professionals**, analyzing adoption drivers and market trends to identify the highest value customer segments for an AI enabled product.
- Synthesized competitive benchmarking, pricing analysis, and commercial research into **go to market recommendations presented to executive leadership**, informing customer targeting and product positioning.

PROJECTS

P2P Workbench | GitHub

- Building a live **procure to pay** workflow tool covering **PR, RFx, PO, goods receipt and invoice**, with **weighted bid scoring** to compare supplier responses, approval routing by value tier and spend category, role based views and invoice matching to flag PO discrepancies.
- Building a **game theory negotiation module** that splits volume across two suppliers through staged auctions, simulating supplier bids against **should cost floors** to show savings compared with a standard sealed bid RFQ.

Nivara Smart Tent | Product Design

- Managed a 7 member **NPD team** through concept, design, and prototype validation, using Gantt schedules and Agile sprints to track milestones and resolve execution risks within a $1,000 budget ahead of a **trade show deadline**.
- Weighed design and material options on function, manufacturability, and cost; managed BOM revisions across prototype iterations.

LEADERSHIP

Graduate Teaching Assistant | Duke Fuqua Client Consulting Practicum

- Led 5 TAs supporting 250+ students, using Trello to track milestones, manage operations, and coordinate stakeholder communication.

SKILLS & CERTIFICATIONS

Skills: Warehouse Operations, Inventory Management, Order Fulfillment, Small Parcel Logistics, KPI Reporting & Data Analysis, Lean Process Improvement, Cost Analysis, Supplier Management, Root Cause Analysis
Tools: Oracle NetSuite WMS, SAP MM, Ariba, Excel (Pivot Tables, XLOOKUP, Macros), Power BI, Tableau, SQL, Python
Certifications: Lean Six Sigma, Rutgers Supply Chain Sourcing & Logistics, Google Project Management, Duke Excel to MySQL, SolidWorks CSWP
